

BARAA JADAAN

Frontend Developer | React.js & TypeScript | Component-Driven UI

+963 997 748 481 · braajad1@gmail.com · github.com/BaraaJadaan · Portfolio

SUMMARY

Frontend Developer with roughly three years building production user interfaces in React.js and React Native — from enterprise admin portals and CMS/CRM systems to consumer mobile apps. Comfortable owning a frontend end to end: component architecture, state management, RESTful API integration, and responsive, cross-browser delivery, working closely with backend and design teams in Agile settings. Bachelor's degree in Artificial Intelligence & Information Technology.

EDUCATION

Bachelor of Engineering in Artificial Intelligence and Information Technology

Damascus University

TECHNICAL SKILLS

Frontend Frameworks: React.js, Next.js, React Native, Flutter

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, Dart

State Management: Redux, Zustand, React Query

UI & Styling: Tailwind CSS, Material UI, GSAP, responsive design

Integration & Tooling: RESTful APIs, Git (branching, pull requests), code review & Clean Code practices, Agile/Scrum collaboration

Backend Familiarity: FastAPI (Python), C#.NET, Supabase (PostgreSQL)

Human Languages: Arabic (Native), English (B2, TOEFL)

PROFESSIONAL EXPERIENCE

Mobile Frontend Developer — Rafeek Darbak (Feb 2026 – Present)

- Own the Flutter-based ride-sharing app “**Rafiq Darbak**” (■■■■■ ■■■■■) end to end — built and shipped across iOS and Android. iOS deployment via Codemagic/App Store Connect and Android release management via Google Play Console including test releases.
- Built, maintained and resolved production issues of the platform's admin panel, iOS and Android.
- Shipped major features including voice messaging, real-time messaging, live location sharing, radius-based matching, and the Explore screen, backed by Supabase (PostgreSQL) for data storage, authentication, and Row-Level Security policies.

Frontend Developer — TabTabGo (Oct 2024 – Feb 2026)

- Sole frontend developer** on a Customer & Network Management Suite for a Danish ISP — built the admin portal, web onboarding portal, and a companion React Native mobile app, including direct client calls to gather and refine requirements.
- Integrated RESTful APIs across the platform and managed client-side application state to deliver responsive interfaces for daily use by the ISP's staff and customers.
- Contributed frontend and dashboard development to a multi-platform Social Monitoring & Dashboard product — a listening and analytics engine tracking talent and campaign performance across social platforms — as part of a broader system re-architecture.
- Delivered comparable frontend builds for several other agency clients across additional industries.
- Took on select backend tasks in C#.NET during later months at the job, extending past the primary frontend scope.

Frontend Developer — ATC Systematic (Rafeed) (Dec 2023 – Aug 2024)

- Built the frontend for Lumytic, ATC Systematic's ERP platform for the lighting industry, including the public marketing website.
- Developed frontend interfaces for the Lumytic CMS and CRM systems used by lighting manufacturers and distributors to manage products, content, and customer relationships.

SELECTED PERSONAL PROJECTS

Filmora — Movie Discovery Portal (React, Redux, Material UI, TMDB API)

- Built a movie search and discovery app with authenticated wishlist functionality, using Redux for state management and the TMDB API for content.

Gamer Wiki — Games Discovery Portal (React, React Query, Zustand, RAWG API)

- Built a games search portal with filtering by popularity and release date, using React Query for server-state caching and Zustand for client state.

OneForAll — E-Commerce Platform (React, Redux)

- Built a product browsing and purchase flow with a points-based billing/rewards system.

Stocks — Real-Time Stock Tracker (React, Alpha Vantage API)

- Built a real-time stock price tracker and financial news feed.

Arabic Poetry RAG Agent (Vanilla HTML/CSS/JS, Python, FastAPI, LanceDB, Docker, MLflow)

- Production semantic search & ReAct agent over 355k+ classical Arabic verse corpus. Hybrid dense vector + BM25 search (LanceDB + Tantivy), Qwen3-Embedding, FastAPI backend with SSE token streaming, and bilingual RTL chat interface.
